1980 CENSUS OF POPULATION AND HOUSING

SAMPLE COUNT TABLES
FOR
THE STATE OF CONNECTICUT

SOCIO-ECONOMIC CHARACTERISTICS
POVERTY STATUS

FORMAT: The report is divided into the following sections by geographic areas:

Section 1. STATE OF CONNECTICUT
Section 2. REGIONAL PLANNING AREAS
Section 3. HEALTH SERVICE AREAS
Section 4. LABOR MARKET AREAS
Section 5. COUNTIES
Section 6. MUNICIPALITIES
Section 7. NON-CONTIGUOUS BOROUGHS AND CITIES

Within each section, data for each geographic area is summarized by a set of 10 tables, presented on one page.

Within each section, the set of tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Hartford. Geographic codes are also listed as appropriate. Pages in this document are numbered within sections.

Definitions regarding poverty thresholds affecting 1979 income are provided in the attached Connecticut Census Data Center Memorandum No. 14, which follows this page.

FOOTNOTES: The footnotes are contained on single pages at the end of each section.

TABLE NUMBERS: The table numbers used are identical to those utilized by the U.S. Bureau of the Census on the summary tape files and microfiche. When more than one table number is shown with a table heading, the data in that table were combined or derived from two or more tables.

SOURCE: Summary Tape File 3A, Bureau of the Census, U.S. Department of Commerce

DEFINITIONS OF MODIFIED POVERTY THRESHOLDS AFFECTING 1979 INCOME

The 1980 Census of Population and Housing, Socio-Economic Charactoristics, provides the best source of small area income and poverty data. The "poverty thresholds" for 1979 income used in poverty statistics in the 1980 Census are presented in the following chart.

Revised poverty thresholds for 1979

Size of family unit	Weighted average thresholds	Related children under 18 years								
		None	1	2	3	4	5	6	7	8 or more
1 person (unrelated individual)	$ 3,686									
under 65 years	3,774	$ 3,774								
65 years and over	3,479	3,479								
2 persons	4,723									
householder under 65 years	4,876	4,858	$ 5,000							
householder 65 years and over	4,389	4,385	4,981							
3 persons	5,787	5,674	5,839	$ 5,844						
4 persons	7,412	7,482	7,605	7,356	$ 7,382					
5 persons	8,776	9,023	9,154	8,874	8,657	$ 8,525				
6 persons	9,915	10,378	10,419	10,205	9,999	9,693	$ 9,512			
7 persons	11,237	11,941	12,016	11,759	11,580	11,246	10,857	$10,429		
8 persons	12,484	13,356	13,473	13,231	13,018	12,717	12,334	11,936	$11,835	
9 or more persons	14,812	16,066	16,144	15,929	15,749	15,453	15,046	14,677	14,586	$14,024

NEW DEFINITIONS OF POVERTY STATUS IN 1979

Families and unrelated individuals are classified as above or below the poverty level by comparing their total 1979 income to an income cutoff or "poverty threshold." The income cutoffs vary by family size, number of children, and age of the family householder or unrelated individual. Poverty status is determined for all families (and, by implication, all family members). Poverty status is also determined for persons not in families, except for inmates of institutions, members of the Armed Forces living in barracks, college students living in dormitories, and unrelated individuals under 15 years old. Poverty status is derived on a sample basis.

The 1980 census definition of poverty reflects revisions recommended by a Federal interagency committee in 1979 to a definition adopted in 1969. The index is based on the Department of Agriculture's 1961 Economy Food Plan and reflects the different consumption requirements of families based on their size and composition. It was determined from the Department of Agriculture's

Phone: (203) 566-8285
80 WASHINGTON STREET • HARTFORD, CT. 06115
An Equal Opportunity Employer

1955 survey of food consumption that families of three or more persons spend approximately one-third of their income on food; the poverty level for these families was, therefore, set at three times the cost of the economy food plan. For smaller families and persons living alone, the cost of the economy food plan was multiplied by factors that were slightly higher in order to compensate for the relatively larger fixed expenses of these smaller households. The poverty thresholds are updated every year to reflect changes in the Consumer Price Index (CPI). An an example, the poverty threshold for a family of four with two related children under 18 can be found on the chart to be $ 7,356 in 1979.

Poverty thresholds are computed on a national basis only. No attempt has been made to adjust these thresholds for regional, State, or other local variations in the cost of living.

The poverty status of a person who is a family member is determined by the family income and its relationship to the appropriate poverty threshold for that family. The poverty status of an unrelated individual is determined by his or her own income in relation to the appropriate poverty threshold. Thus, two unrelated individuals living together may not have the same poverty status.

Households below the poverty level are defined as households in which the total income of the family or the householder of a nonfamily household is below the poverty level. The incomes of persons in the household other than members of the family or other than the householder in a nonfamily household are not taken into account when determining poverty status of a household.

Because the poverty levels currently in use by the Federal Government do not meet all the needs of the analysts of the data, variations of the poverty definition are available in terms of various multiples of the official poverty levels. The one most frequently tabulated is 125 percent of the poverty level, where a family or person may have up to 25 percent more income than normally allowed under the poverty threshold appropriate for the family size, etc.

Below poverty level ("poor"). Families or persons whose total family income or unrelated individual income in 1979 was less than the poverty threshold specified for the applicable family size, age of householder, and number of related children under 18 present. In certain tabulations, this group is further subdivided into those with income "below 75 percent of poverty level" and "between 75 and 99 percent of poverty level."

Above poverty level ("nonpoor"). Families or persons whose total family income or unrelated individual income in 1979 was equal to or greater than the poverty threshold specified for the applicable family size, etc. In certain tabulations, this group is further subdivided into those with income "between 100 and 124 percent of poverty level," "between 125 and 149 percent of poverty level," "between 150 and 174 percent of poverty level," "between 175 and 199 percent of poverty level," and "200 percent of poverty level and above."

Limitations: The term "poverty" connotes a complex set of economic, social and psychological conditions. The standard statistical definition provides only estimates of economic poverty based on the receipt of money income before taxes. Excluded from the income concept is a measure of the benefits derived from the receipt of in-kind government transfers, such as food stamps, medicaid, and public housing; private transfers such as health insurance premiums paid by employers; the value of the services obtained from the ownership of assets, such as owner-occupied housing units; and the receipt of money from the sale of property, withdrawal of bank deposits, gifts and money borrowed. A comprehensive review of the current poverty definition and its limitations can be found in The Measure of Poverty, U.S. Department of Health, Education, and Welfare, April 1976.

Historical comparability: Poverty statistics were first included in a decennial census in 1970. Prior to 1980 the poverty thresholds did not distinguish among families with 7, 8, and 9 or more persons; on the other hand, the cutoffs were further differentiated by the sex of the family head or unrelated individual and by farm/nonfarm residence. In the 1970 census, the thresholds for farm residents were set at 85 percent of the thresholds for nonfarm residents. 1979 income thresholds used in the 1980 census represent a weighted average of the nonfarm thresholds used in the past for male headed and female headed families. The elimination of the 85-percent threshold for farm families increased the farm population classified as poor by about 174,000 persons or about one-fifth nationwide. The net effect of all three changes on the total number of poor persons is to increase it approximately 380,000 or 1.5 percent.

Since the poverty income cutoffs have been adjusted each year for changes in the CPI, and since the overall impact of the definitional changes is minimal, 1980 census poverty figures for the total and nonfarm population should be reasonably comparable to the 1970 poverty figures. However, because of the definitional changes cited, comparisons involving the farm population should be made with caution.

EXPLANATIONS OF CHANGES WITH POVERTY THRESHOLD DEFINITIONS

Since the 1960's, the Federal Government has defined poverty for statistical purposes, establishing a set of thresholds showing the income needed for basic living expenses, and in particular for a nutritionally adequate diet.

Recently, the following technical modifications were made to the poverty definition:

- o There are no longer separate sets of poverty thresholds for the categories "Families with a female householder, No husband present" and "All other families." Instead, a weighted average of the two sets of thresholds is used for all families.
- o Differences in the poverty thresholds based on farm/nonfarm residence have been eliminated through the use of nonfarm thresholds for all families and unrelated individuals.
- o The poverty matrix has been extended to families of nine or more persons from the original cutoff of seven or more persons.

The modified poverty matrix provides a range of income cutoffs adjusted by family size and number of children under 18 years old. The cutoffs for unrelated individuals and two-person families are further differentiated by the age of the individual or family householder (under 65 years and 65 years and over).

Poverty thresholds incorporating the three changes have been computed for 1978, the base year for the revised poverty definition. This matrix will be adjusted annually for increases in the Consumer Price Index, using the same procedure as in previous years.

The modification of the poverty definition was prompted by the concern that different poverty thresholds based on sex may be interpreted as discrimination against women. These distinctions grew out of differences in nutritional needs based on variations in family composition, but there is little evidence to suggest that these differences translate into different overall income needs. The farm thresholds were previously set at 85 percent of the nonfarm thresholds to account for the value of food produced and consumed on the farm and of housing included as part of the farm operation. The lower farm thresholds are now considered unfair, primarily because the value of other noncash benefits (for example, Medicare, food stamps, and subsidized housing) is not taken into account in determining poverty status. Finally, separate data for families of more than seven persons were not available when the original definition was developed. Since then, information on larger families has become available, and consequently the poverty matrix was expanded.

The chart on page 1 shows the revised thresholds for 1979, which are being used to tabulate poverty statistics from the 1980 census. These thresholds and a summary of the revisions were published in the Federal Register on December 28, 1981. The revised definition will also be used to produce March Current Population Survey (CPS) poverty estimates starting with the March 1982 survey.

The combined effect of the three modifications on the poverty population is quite small, according to data from the March 1980 Current Population Survey. Under the old definition, the total number of poor persons in 1979 was 26.1 million; under the new definition, 26.5 million. The corresponding poverty rates were 11.7 and 11.9.

In a few cases, the increases in poverty were more substantial. For 1979, the number of poor persons living on farms was, according to the old matrix, 967,000, a difference of about 20 percent. This increase was expected since the thresholds applied to farm families are approximately 15 percent higher under the revised definition.

The revisions are minor modifications to the original definition. The changes generally result in only a slightly higher number of poor, particularly at the national level. Data from the 1980 census for local areas (becoming available now in Summary Tape File 3) may show a greater impact, particularly in areas with large farm population.

For more information about these modifications, contact Tom Gelinne, Population Division, Bureau of the Census, Washington, D.C. 20233, telephone 301/763-5790.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics - Poverty Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

1/83

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.

SECTION 2. REGIONAL PLANNING AREAS

FORMAT: Within this section, data for each regional planning area is summarized by a set of 10 tables.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Capitol Regional Planning Area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics - Poverty Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

1/83

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.

SECTION 3. HEALTH SERVICE AREAS

FORMAT: Within this section, data for each health service area is summarized by a set of 10 tables.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: North Central Connecticut Health Service Area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics - Poverty Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

1/83

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.

SECTION 4. LABOR MARKET AREAS

FORMAT: Within this section, data for each labor market area is summarized by a set of 10 tables.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Ansonia Labor Market Area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics - Poverty Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

1/83

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count,' where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.

SECTION 5. COUNTIES

FORMAT: Within this section, data for each county is summarized by a set of 10 tables.

Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Hartford County. Geographic codes are also listed with each area.

FOOTNOTES: The footnotes are contained on a single page at the end of this section.

80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.

SECTION 6. MUNICIPALITIES

FORMAT:	Within this section, data for each municipality is summarized by a set of 10 tables. Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Andover. Geographic codes are also listed with each area.
FOOTNOTES:	The footnotes are contained on a single page at the end of this section.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics - Poverty Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

1/83

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.

SECTION 7. NON-CONTIGUOUS BOROUGHS AND CITIES

FORMAT:	Within this section, data for each non-contiguous borough and city is summarized by a set of 10 tables.
	Tables are arranged in alphabetic order by name of area. The area which the tables describe is indicated at the top of each page; for example: AREANAME: Willimantic City. Geographic codes are also listed with each area.
FOOTNOTES:	The footnotes are contained on a single page at the end of this section.

5 YEARS ONLY	134	23
6 TO 17 YEARS	1939	412
OTHER FAMILY MEMBER	3868	137

95. PERSONS FOR WHOM POVERTY STATUS IS DETERMINED BY POVERTY STATUS IN 1979 (23)

INCOME BELOW 75 PERCENT OF POVERTY LEVEL	1169
INCOME BETWEEN 75 AND 125 PERCENT OF POVERTY LEVEL	1396
INCOME BETWEEN 125 AND 149 PERCENT OF POVERTY LEVEL	828
INCOME BETWEEN 150 AND 199 PERCENT OF POVERTY LEVEL	1475
INCOME 200 PERCENT OF POVERTY LEVEL AND ABOVE	8579

NOTES:
A. -99 INDICATES THAT THE DATA ITEM HAS BEEN SUPPRESSED.
B. THE TABLE NUMBERS ARE THE SAME AS THEY APPEAR ON THE SUMMARY TAPE.
C. NUMBERS IN PARENTHESES ARE FOOTNOTE NUMBERS. SEE FOOTNOTE PAGE.
D. * REPRESENTS AT LEAST ONE CHILD IN BOTH AGE GROUPS.
E. DATA IN THIS PROFILE IS BASED ON A SAMPLE REPRESENTING THE ENTIRE POPULATION AND MAY DIFFER FROM COMPLETE COUNT DATA.

Connecticut: 1980 Census of Population and Housing
Socio-Economic Characteristics - Poverty Status
Sample Counts from Summary Tape File 3A, U.S. Bureau of the Census

1/83

Connecticut Census Data Center
Office of Policy and Management
80 Washington Street
Hartford, CT 06106
(203) 566-8285

NOTE: The 1980 Census of Population and Housing contains two sets of data: information from the "complete count" and from the "sample." The data from questionnaires used to ennumerate the population are referred to as counts, and therefore the "complete count" data describes the responses to questions asked of all persons. Complete count is synonymous with a 100% sample. Information presented in this report is from the "sample count," where each household was asked 19 basic questions on population and housing, and another 43 questions on socio-economic subjects. Since the Census Bureau never releases data on an individual person or household the data is instead collapsed into "summary tables." Each table presents counts for a given geographic area, such as a city or a census tract. The tables presented in this report have been extracted from the third computer tape file of these summary tables. This file, called Summary Tape File 3A, or STF 3A, contains the data from the sample count. The tables presented here are for a specified geographic area which is indicated on the top of each page.

FOOTNOTES:

(4) "Asian and Pacific Islander," in the 100-percent tabulations, includes "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

(10) A "Child of Householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own Child of Householder" is a never-married child who is under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related Children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

In subfamilies an "Own Child" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of a mother in a mother-child subfamily, a father in a father-child subfamily, or either spouse in a married-couple subfamily.

(23) Tabulations of poverty status exclude inmates of institutions, members of the armed forces living in barracks or on military ships, college students living in dormitories, and unrelated individuals under 15 years (see footnote 54).

(54) "Unrelated Individuals" include nonrelatives in family households, persons in nonfamily households, and noninmates in group quarters.
